

# Teacher area

All teachers should link curriculum learning with careers.

Some ideas to engage your classes with careers are as follows:-

- Show a short video clip as a starter activity using the resources on [careersbox](#) / [icould](#) / [firstcareers](#) or [BBC bitesize careers](#) to show the relevance of lessons for possible future careers
- Discuss careers linked to specific parts of your curriculum —use this website to help you <https://nationalcareers.service.gov.uk/explore-careers>
- Set a homework task to research different careers related to your subject.
- Browse and use the careers lesson inserts on the world of work website—<https://www.myworldofwork.co.uk/lesson-inserts>
- Utilise STEM careers resources— <https://www.stem.org.uk/resources>
- Take into account growth industries in the Liverpool City Region—<https://growthplatform.org/sectors/>

Request support from your Careers Leader / Enterprise Coordinator to bring in a guest speaker to talk to students about careers or to deliver part of a lesson. The [STEM Ambassador Programme](#) or [Inspiring the Future](#) can support with this
